## UNTIL 14 m HEIGHT IN OFF-ROAD

The new **Socage A314** refresh its makeup and prepares itself to land on the Italian and International markets with an innovative mounting on **Isuzu D-Max**, the Japanese pick up which has already been appreciated for its efficiency.

A314, both on Land Rover Defender and on Isuzu D-Max, is the **best choice** to operate at height in perfect safety off-road, where standard platforms cannot arrive and even stabilize due to terrain roughness.

Able of a maximum working height of **14 m** and a lateral outreach of **6.5 m**, A314 has got a loading capacity of **225 kg** ( maximum in its class ).

A314 is equipped with 360° slewing system of the aerial part and, thanks to the **EASY LIFT** stabilization system ( International Socage's patent ) can be ready for working in few seconds.

Socage, like in all the other models of the product range, has developed the A314 in a way to assure the maximum reliability, by inserting hydraulic and electric connections inside the carpentry to avoid that accidental collisions while operating would damage them.

The Isuzu installation allows the operator to use the **residual loading space** because the pick up maintains its sideboards.

## LMZ CHOOSES THE BRAND NEW TJJ70

LMZ Sollevamenti S.r.l. from Bollate (Milan - Italy) has chosen the brand new **Socage TJJ 70** to complete its access platform fleet. LMZ is a renting company established by 3 of the major north Italian companies which works as an "organizational hub" for the most important Italian

companies' inquiries. The brand new TJJ 70, flagship of Socage product range, is able of a maximum working height of **70 m** and of a maximum working outreach of **36,5 m**. It's maximum loading capacity is **600 kg**! LMZ will use this new model for carrying out interventions in chemical and petrochemical plants, on civil buildings, etc...

TJJ 70 may be equipped with **900 kg loading capacity hydraulic winch**.
