Nissan Atleon truck.

The access platform has been purchased by the police department of the Arab Emirate for rescue and public utility interventions; the choice of a DA324 model has been done because it offers a maximum working height of 24 m and a maximum outreach of 11 m loading a maximum of 225 kg. The DA324 has been appreciated also for its extreme easy controls and for its fast and precise positioning, in addition to the fact that is totally hydraulic controlled which facilitates the maintenance work. Socage is increasing notably its sales presence in these countries, and in general in not European countries, through the sale of access platforms in kit, ready to be mounted by local dealers on local trucks.

## NEW TRUCK MOUNTED CRANE LINE

**Socage** has just added a new product line in its range: the brand new **TK** line. It is a truck mounted mobile crane range which can be mounted on **18** and **26** ton truck (depending on load

capacity). The **TK35** is the most performing model and it's able of a maximum loading moment of **35 tm**. Its maximum outreach is **23.7 m** without fly-jib and **35.2 m** with fly-jib.

TK cranes are equipped with slewing 2-extensions stabilizers and remote radio control.

## 28 M OF COMPACTNESS

The brand new **DA328** distinguishing feature is for sure its extreme compactness; in fact, considering that it is able of a maximum working height of **28 m**, it is just **6,9 m** long and **3,1 m**

high ( mounted on Mitsubishi Canter 6 ton truck ).

Its particular **stabilizing system** allows this model to be operated both with extended or closed to shape outriggers ( just **2,1 m** wide in the closed to shape configuration ). DA328 is equipped with: 90°+90° basket rotation, 225 kg load capacity, radio control for aerial structure operation, 360° continuous rotation of the aerial part.
